PROFILE

Software Developer with 4 years of experience in designing and developing scalable backend applications using Java, Spring Boot, Struts, and AS400. Skilled in building secure, high-performance systems with strong debugging expertise and a solid grasp of backend workflows and enterprise architecture.

PROFESSIONAL EXPERIENCE

Software Developer; Full Stack,
Euronet Merchant Services

11/2021 – 03/2026 | Mumbai, India

- **1. Web CMS Portal: Debit Card Management System:**
- Developed a user-friendly portal to streamline debit card operations and enhance internal user workflows. Key contributions:
- Designed and implemented User Management features including Add/Edit/View, password resets, and approval workflows.
- Built Role Management to support granular access control and secure user provisioning.
- Developed Card Operations modules: status changes, hotlisting, activation, block/unblock, and approvals.
- Implemented Limit Profile Management for transaction limit changes and approvals.
- Built Customer & Account Management, including account linking/delinking and swap functionality.
- Integrated Channel Blocking operations with request and approval workflows.
- Developed modules for PIN Issuance and Reporting, including card transaction history and master card reports.
-
- **2. API Development: Card Services**
- Designed and developed secure, scalable APIs to support core debit card operations across channels and systems:
- Channel Control API: Enabled secure access regulation across ATM, POS, and e-commerce channels with role-based controls.
- Card Status Management API: Handled real-time card activation, blocking, hotlisting, and status queries to support instant updates across services.
- Limit Management API: Built flexible APIs for configuring transaction limits by amount, channel, and frequency, supporting dynamic business rules.
- Card Issuance API: Delivered APIs for seamless provisioning of virtual and physical cards with secure personalization workflows.
- PIN Management API: Developed PCI-DSS compliant APIs for PIN generation, validation, reset, and change, ensuring secure credential handling.

SKILLS

Core Java, SQL, Java Script, Spring Boot, Struts, Jenkins, Jira, SonarQube, Ajax, GitHub

EDUCATION

Bachelor of Engineering in Computer Engineering,
University of Mumbai

06/2017 – 10/2020 | Mumbai, India

Diploma in Computer Enngineering,
University of Mumbai

06/2014 – 05/2017 | Mumbai, India

CERTIFICATES

QSpiders Global: Software Development Full Stack
